Challenges

Meet the Creator

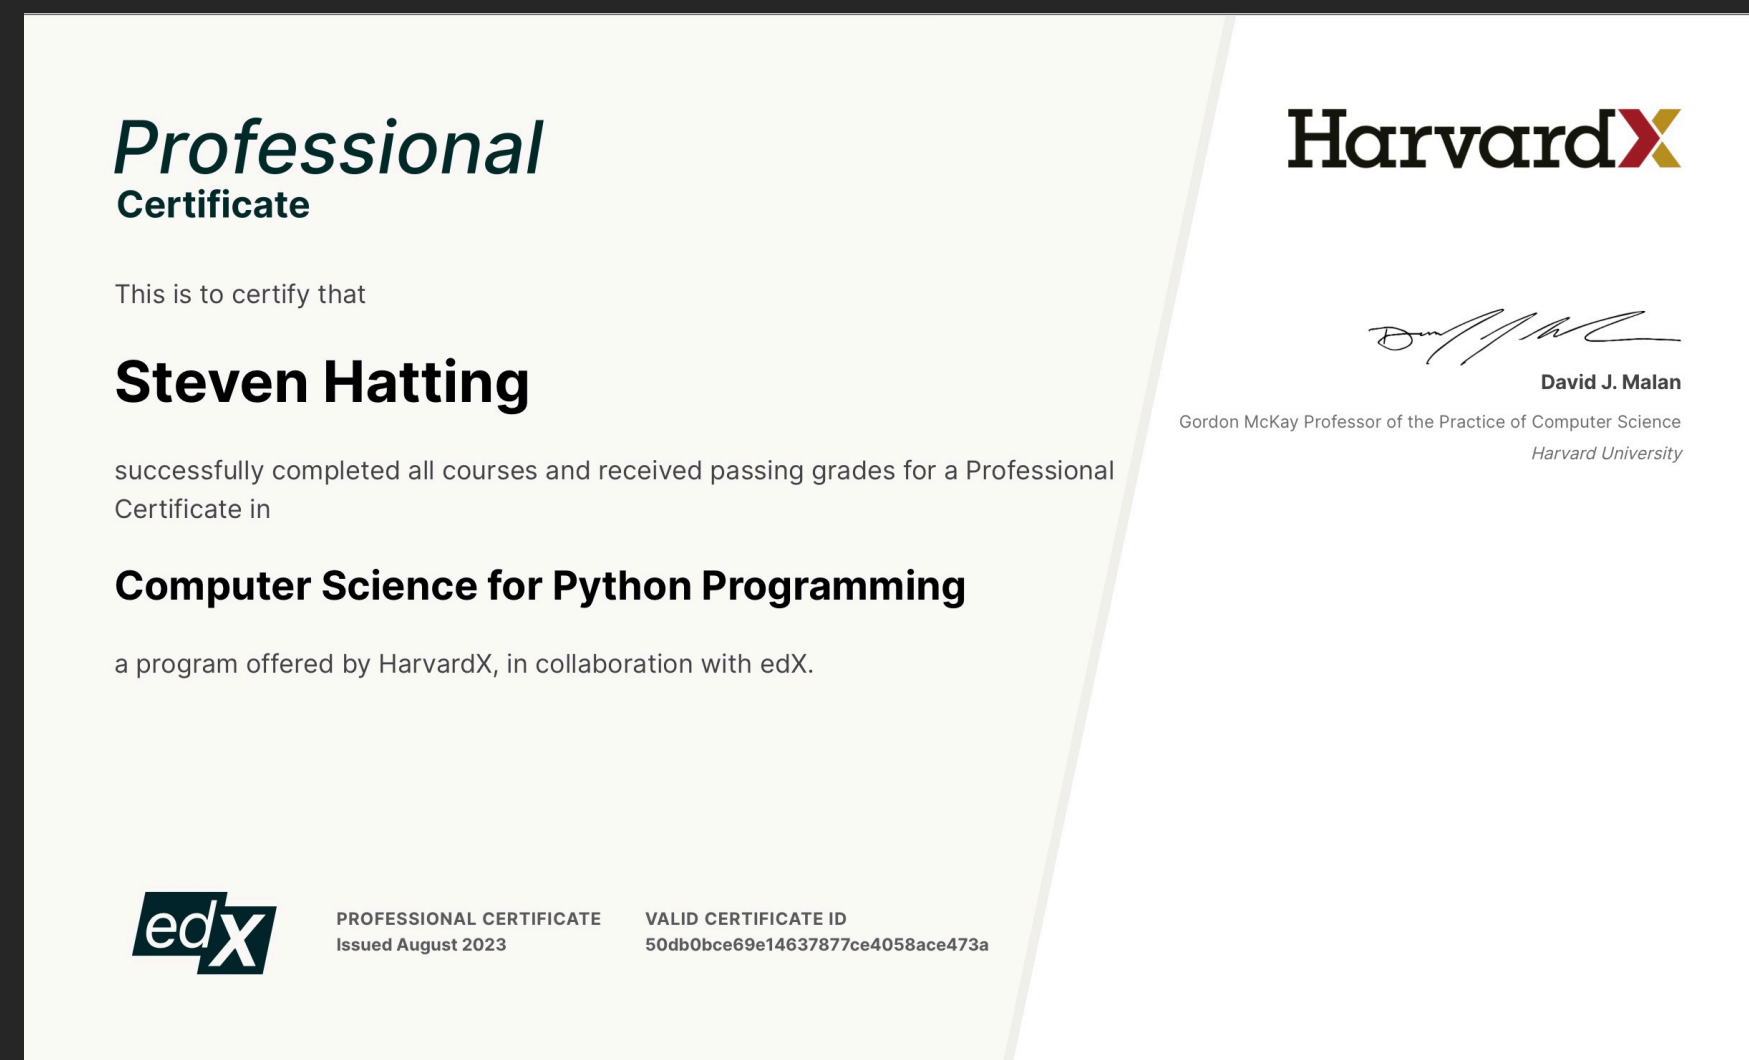

STEVE

Administrative & Lead Developer

Steven Hatting

I am very interested in using technology to further education and both personal and professional development.

During this project, I mainly worked with programming using Python & Ren'Py, creating and rendering 3D characters, and designing camera shots for various scenes

STARS, STRIPES, & SECOND CHANCES

An Interactive Graphic Novel for ESL Learners with Ren'Py

Interactive

The Player plays as the main character and interacts with the other characters in the story throughout the game.

Diverse Mini-Games

Using both Python & Ren'Py, the player can practice with various vocabulary & grammar mini-games as well as developing listening and reading comprehension skills

Visual Novel Format

Based on Krashen's comprehensible input hypothesis of utilizing comic books in order to learn English.

Cross-Curricular Content

Focus is on the English language, but also incorporates American history, sports, emotional intelligence, culture, and holidays.

RELEVANT STATISTICS

Scenes

Literature Review of “Comic Book Reading, Reading Enjoyment, and Pleasure Reading Among Middle Class and Chapter 1 Middle School Students” (Ujiie & Krashen, 1996)

- ~ Comic book reading correlates with increased pleasure reading & reading enjoyment
- ~ Comic book readers tend to read more books
- ~ Comics can also be a bridge between written and spoken language
- ~ Comics are more engaging than regular books
- ~ Less intimidating entry point for reading
- ~ Can potentially help struggling or reluctant readers

PROJECT CONSTRAINTS

Technological Constraints

Needs to be run on a computer with the correct hardware - Mac, Windows, or Linux

Development Constraints

This project only had around 1 month to really create and develop - imagine what could be with even more time...

Educational Constraints

While I am an EFL teacher, having someone who develops curriculum would be a great asset for better developing the lessons and introductions to grammar and vocabulary.

Cultural Sensitivity

Beta testers were difficult to find since the game incorporates music and the area where I live is very sensitive to using music

EXPECTED VS. FINAL DELIVERABLES

Storyline over 6 weeks
Originally designed to be a game encompassing a 6-week long story

Fun Party Game
Originally thought to include a game similar to DDR during the party scene in week 3

6 Reading Comprehension Exercises
Originally designed to be 1 reading comprehension exercise per week

6 Listening Comprehension Exercises
Originally designed to be 1 listening comprehension exercise per week.

Storyline over 3 weeks
Became a story that lasts for only 3 weeks

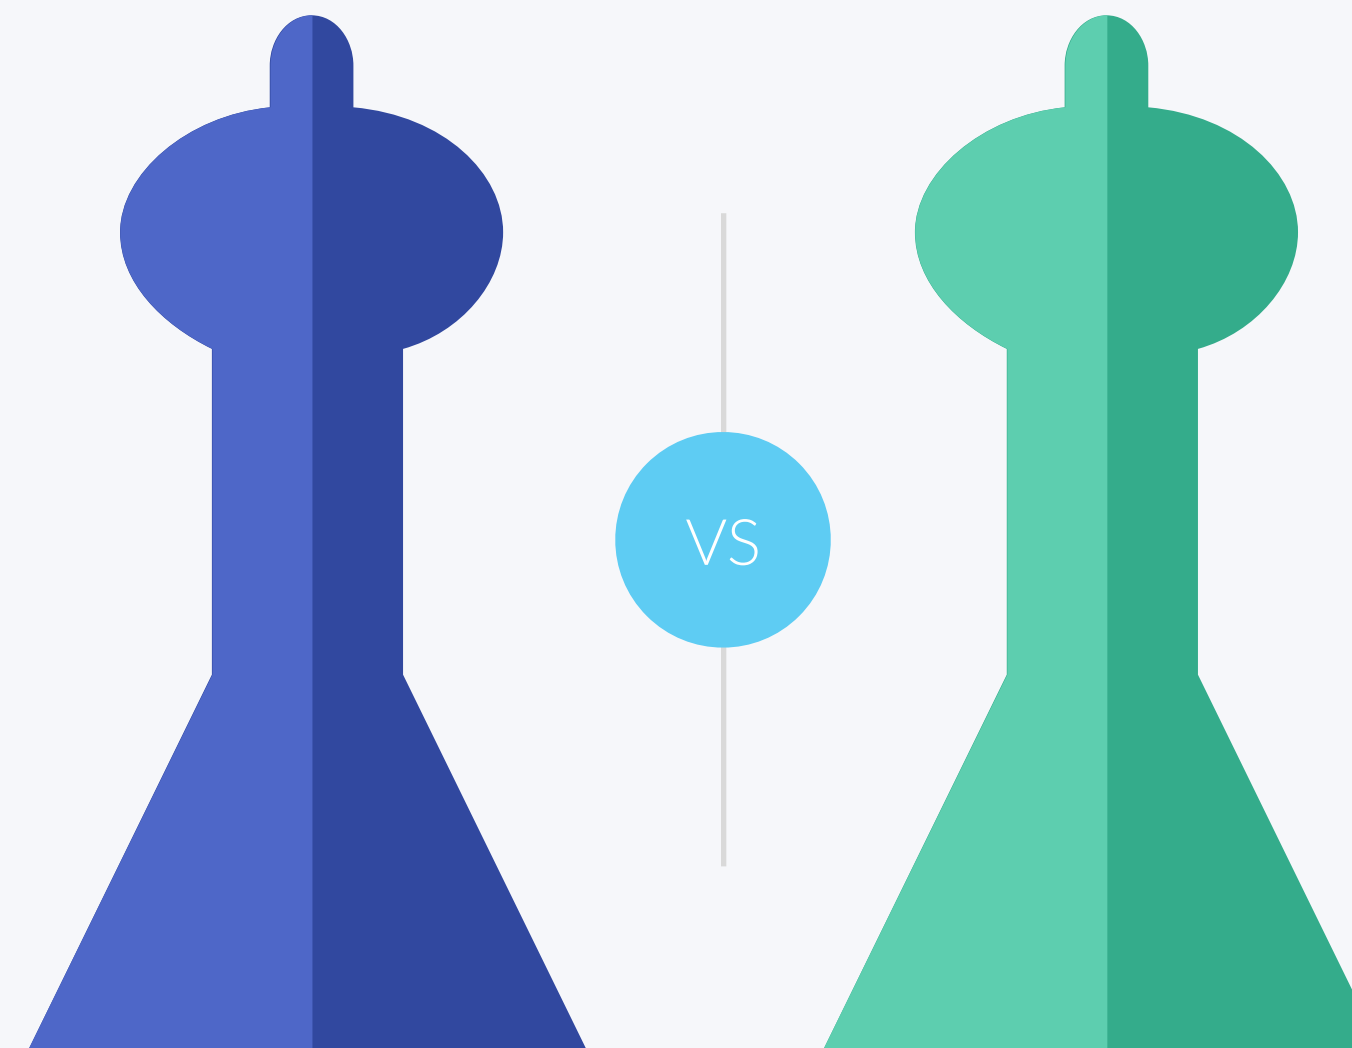

Fun Party Dialogue
Decided to include a dialogue instead - also music & dancing is a sensitive topic to some West Asian cultures

5 Reading Comprehension Exercises
Turned into multiple reading comprehension exercises per week, but in 3 rather than in 6 weeks.

3 Listening Comprehension Exercises
Became 1 listening comprehension exercise for week 1 and 2 for week 2, but 0 for week 3.

Major Milestones

Storyline
Creation

Curriculum
Development

Graphics
Design

Coding

Review

TESTING & VALIDATION

Content Validation

Checked the accuracy of the grammar and content with another English language instructor

Technical Testing

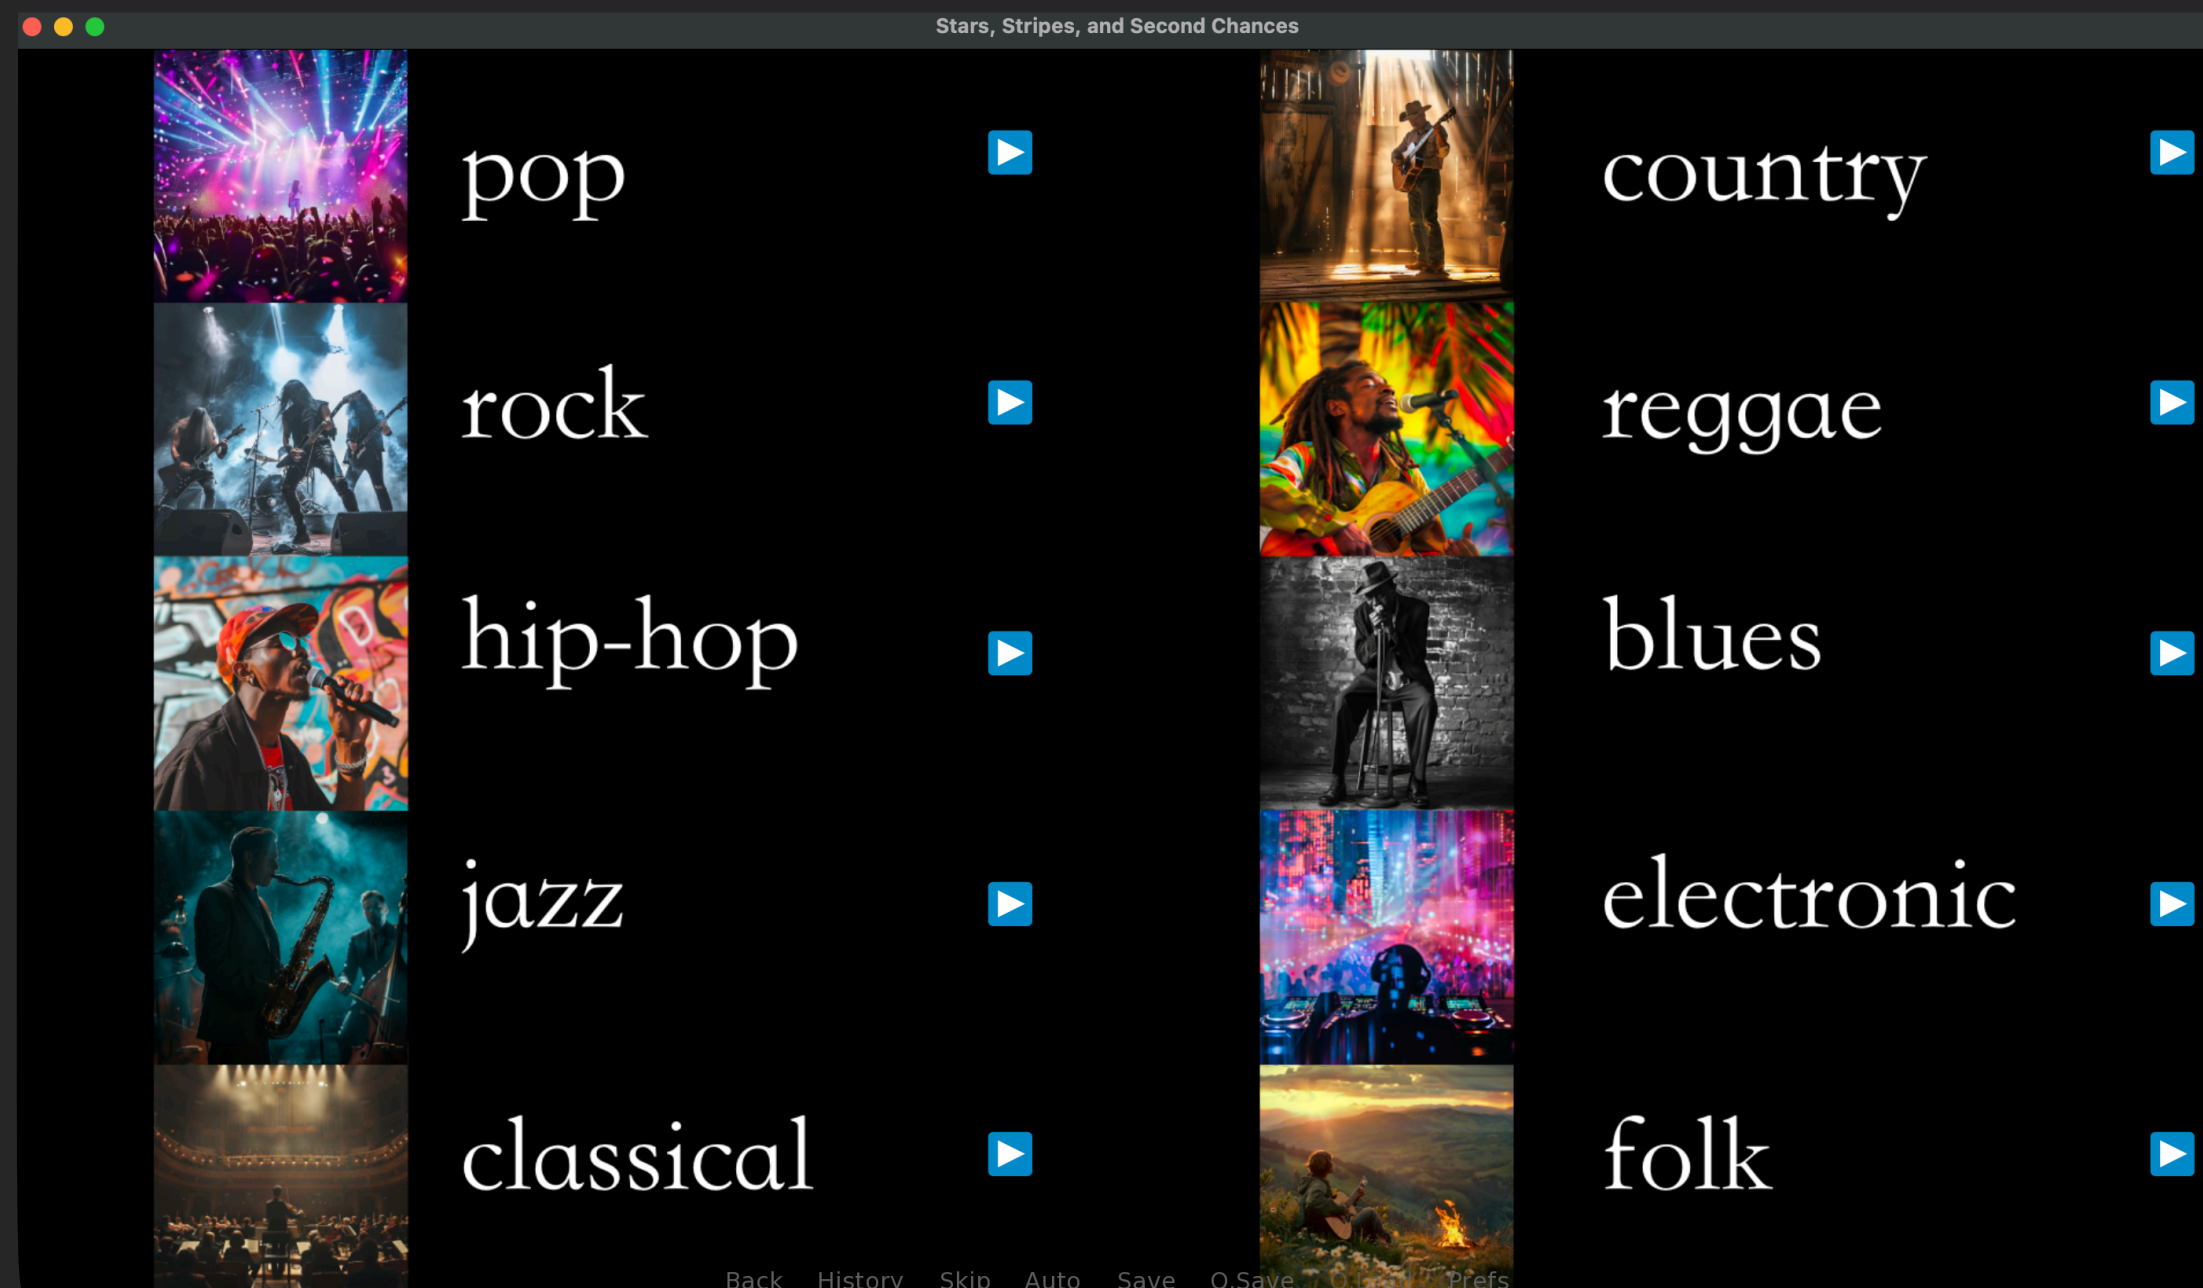

Tested the ability to run on different operating systems of MacOS 14.5 and Windows 11 22H2

Pedagogical Review

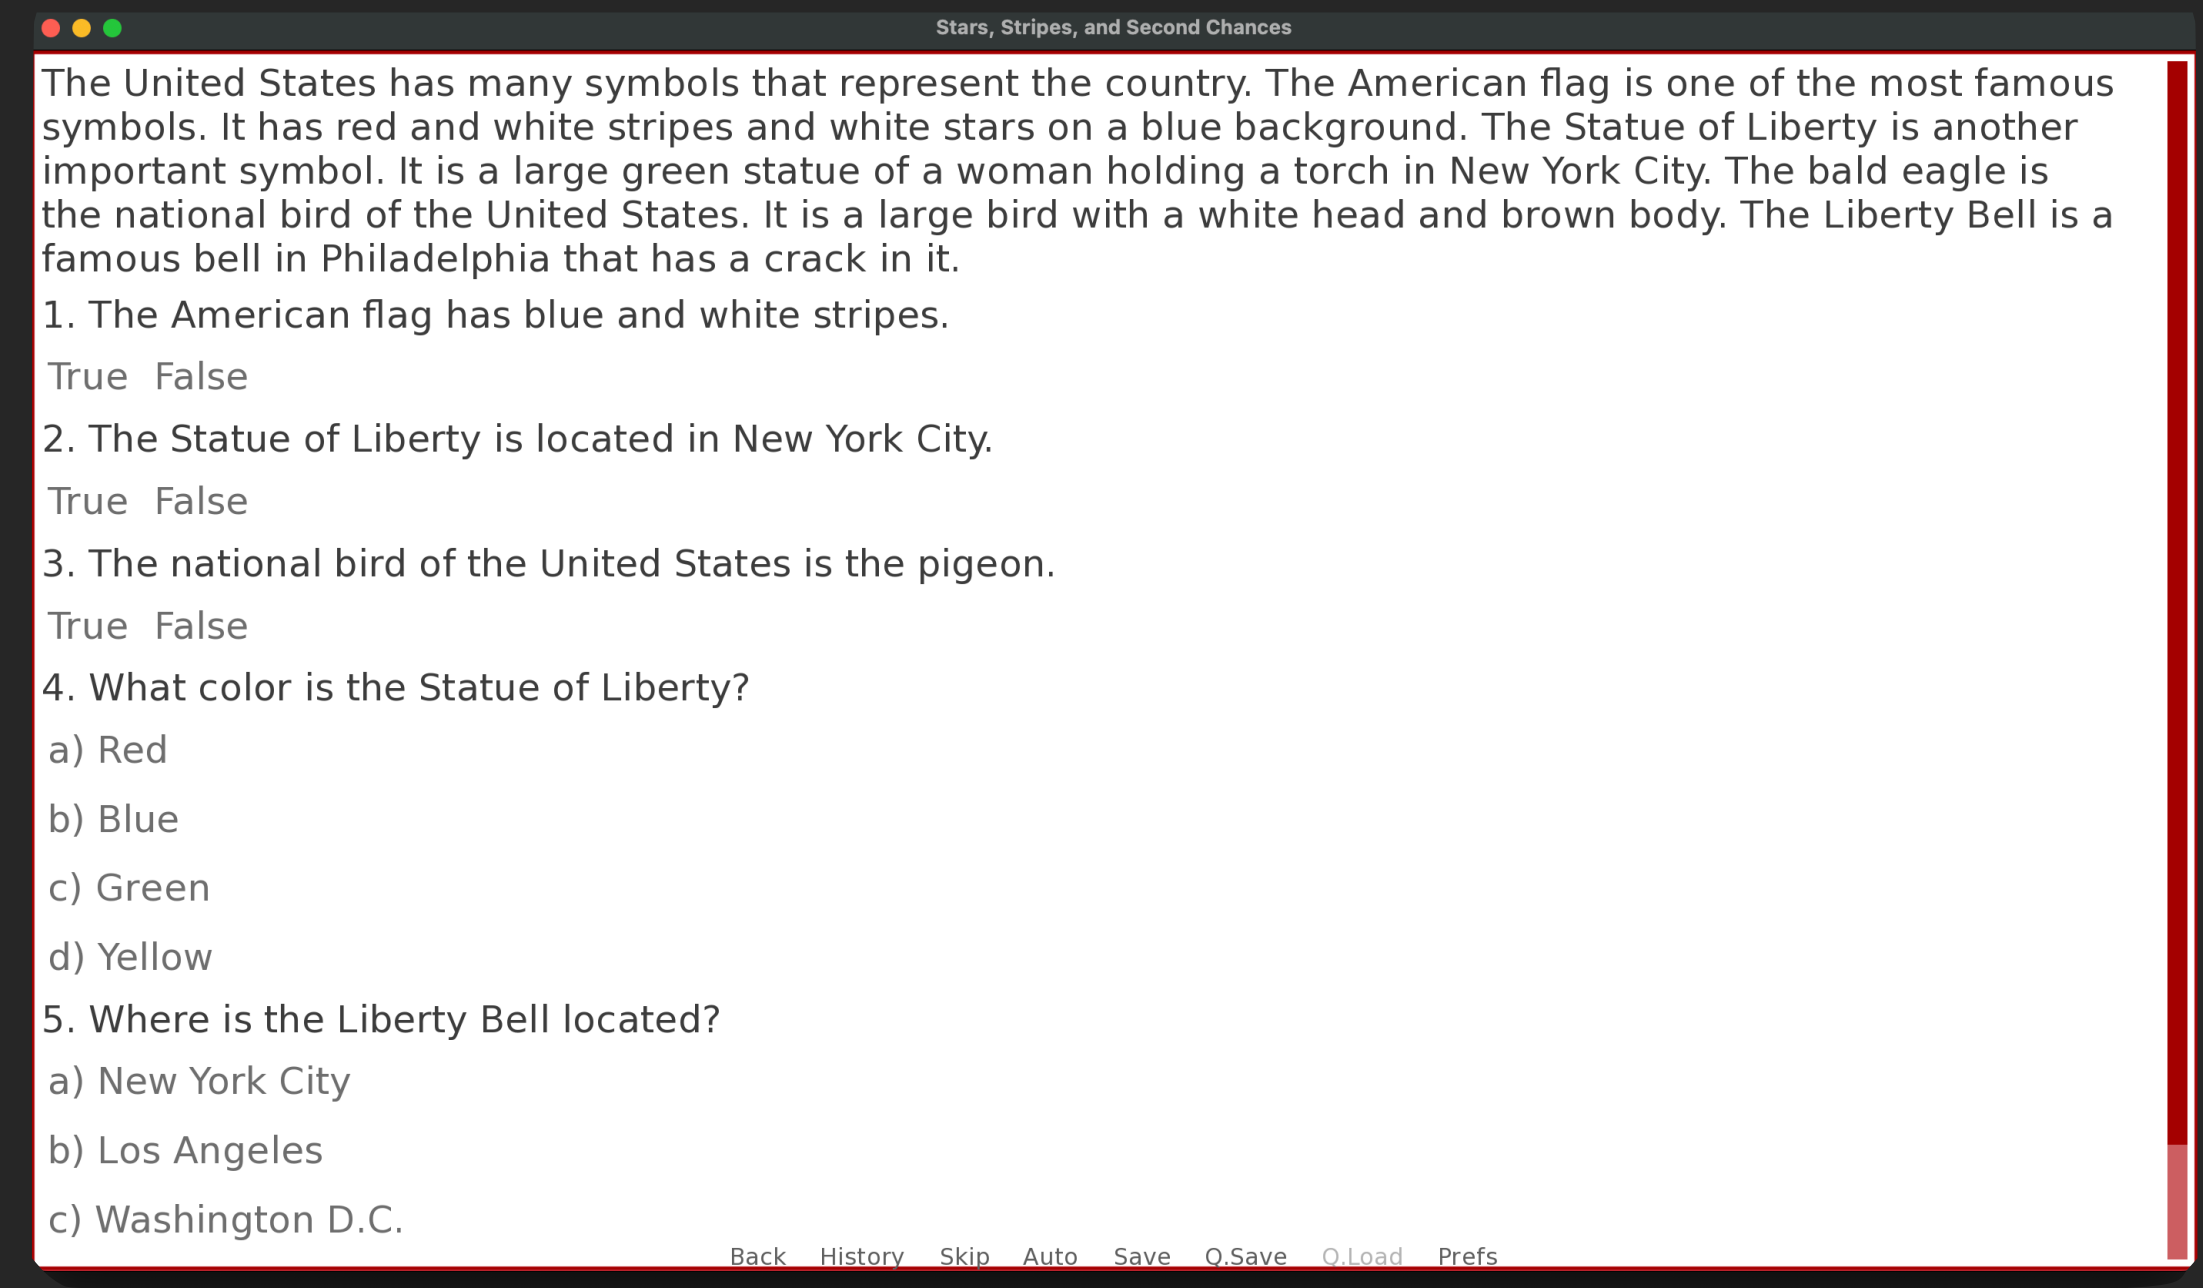

Reading comprehension exercises were checked with an English language expert in reading and writing

VISUALS

Vocabulary Learning Screen

A vocabulary training screen where the player can play the pronunciation of the word - later this turns into a vocabulary mini-game

Reading Comprehension Exercise

An example of a reading comprehension screen - most of which are based on American culture

VISUALS

Pelmanism Mini-Game

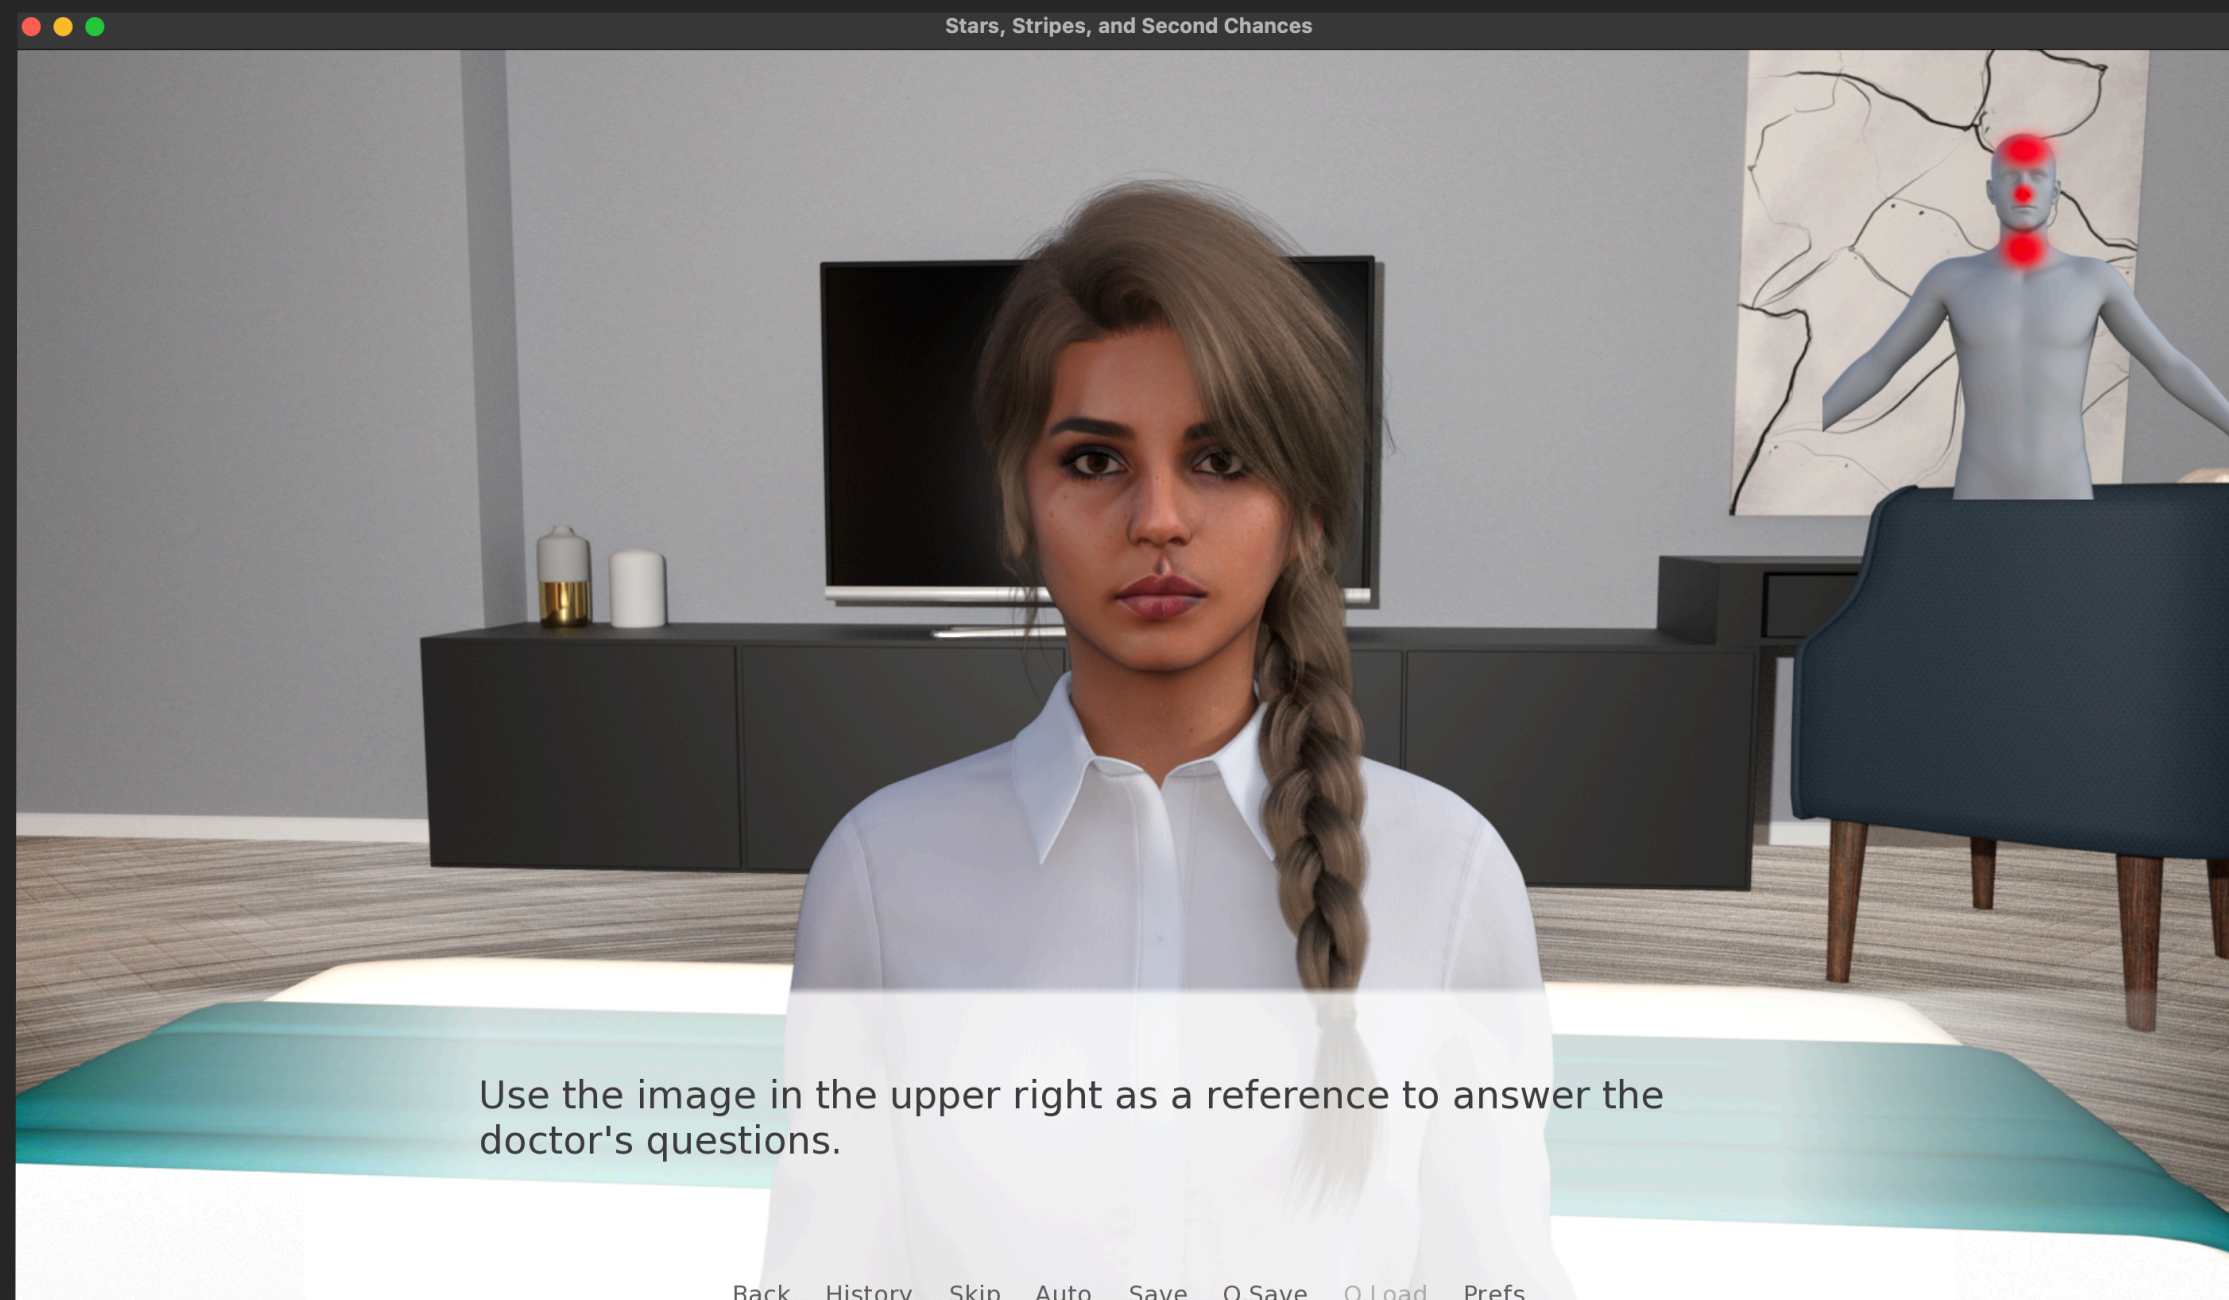

An example of a matching (pelmanism) mini-game based on some American football vocabulary that the player previously learned

3D Rendered Character with Background

One of the main characters that the player interacts with throughout the game

VISUALS

Interview with Doctor about Symptoms

A doctor who is going to interview the main character (role of the player) in order to find out what the symptoms are

3D Rendered Background of Auditorium

A 3D rendered scene in the finale of the school where the main character gives a speech which ultimately leads to a successful or failed ending

CHALLENGES

Finding a way to create images

Understanding Capabilities of Ren'Py

Adding different mini-games

Working with Ren'Py Screens

Conclusion

- **Future Implications:**

- Add the last 3 weeks as originally planned
- Add more listening & reading activities
- Cover more grammar topics
- Add more dialogue and events to the storyline
- Adapt mini-games into a revision program without a storyline
